Recommendation Details:

[measurement] google_analytics

Install Google Analytics to track visitor behavior and understand traffic sources.

[measurement] gtm

Use GTM to manage and deploy marketing tags without modifying code.

[measurement] clarity

Install Microsoft Clarity to see visitor session recordings and heatmaps.

[measurement] hotjar

Consider adding Hotjar to collect feedback and run user surveys on your website.

[retargeting] meta_pixel

Install Meta Pixel to retarget website visitors through Facebook and Instagram advertising campaigns.

[retargeting] google_ads

Set up Google Ads tags to reach previous visitors when they search on Google or browse other sites.

[retargeting] linkedin_insight

Add the Insight Tag to measure B2B conversions and retarget audiences.

[retargeting] tiktok_pixel

Add TikTok pixel to measure conversions from TikTok.

[retargeting] pinterest_pixel

Add Pinterest pixel for retargeting.

[conversion] contact_form

Add a clear contact form to capture visitor inquiries directly.

[conversion] newsletter_form

Add a newsletter form.

[conversion] whatsapp

Enable WhatsApp chat to let visitors connect with you instantly.

[conversion] messenger

Enable Facebook Messenger chat on your site.

[conversion] live_chat

Install a chat tool to engage visitors in real-time.

[conversion] calendly

Integrate Calendly for easy booking.

[conversion] crm

Connect your site to a CRM to automate lead tracking.

[trust] cookies

Add a cookie consent banner for legal compliance.

[trust] privacy_policy

Create a Privacy Policy page to satisfy legal requirements and build trust.

[trust] terms

Publish Terms & Conditions to protect your business liability.

[trust] contact_page

Create a dedicated contact page with clear business details.

[trust] accessibility

Improve basic web accessibility.

[seo_ai] canonical_url

Define a canonical URL to avoid duplicate content SEO issues.

[seo_ai] meta_description

Write a compelling meta description to improve click-through rates from search results.

[seo_ai] sitemap

Create a sitemap to help search engines find and index all your website pages.

[seo_ai] robots

Add a robots.txt file to instruct search crawlers which pages they should or should not index.

[seo_ai] schema_markup

Add structured data schema to help Google and AI assistants understand your business content.

[seo_ai] opengraph

Add OpenGraph metadata to control how your pages look when shared on Facebook and LinkedIn.

[seo_ai] twitter_card

Set up Twitter Card tags to ensure rich previews on X (formerly Twitter).

[seo_ai] llms_txt

Add an llms.txt file at the root of your domain to guide AI crawlers.

Thank you for using Website Auditor.
